

How dangerous Japan's summer is.

We compared the temperature of the hottest month. Japan's temperature is as high as the country's that is under the equator. Here is the temperature(°C) and humidity(%) that you should pay attention to. They are according to area.

Europe : Over 22°C or 60%
North America : Over 25°C or 60%
Oceania : Over 25°C
South America : Over 25°C
West Asia : Over 50%
